

AJAX Developer - Design & Web Team

By joining Design & Web Team in Romania you will be part of the team that will contribute to the process of shaping and deciding tomorrow's products and technologies. You will be working in the cool and demanding office in Bucharest together with some of the best software and quality engineers.

Job description

Recognizing that employees are at the core of our success, Adobe recruits and retains highly qualified and motivated individuals creates an environment where they can innovate and achieve their best, and rewards them for their performance by giving them an opportunity to share in the company's success.

Position summary

The Design & Web team in Romania is looking for an experienced, highly-motivated software engineer with good architectural and development skills as well as a passion for creating great web applications. You will work closely with a team of similarly outstanding individuals in Romania and US with the goal to enable non-technical persons to easily implement web applications with rich & dynamic UI. Based on an existing Web Frameworks foundation, Open Ajax Alliance specifications and Spry, you will build Flash widgets ready to be integrated in web sites using Business Catalyst, Dreamweaver and other applications.

Main responsibilities:

- Work independently and own multiple features of the product
- Transform requirements into architectural and feature specs
- Design & implement features, required APIs, test suites or technology according to specifications, while keeping a strong customer focus
- Interact with the quality engineers, to ensure project deliverables meet the required quality standards
- Perform research on various technologies useful for the project
- Provide status and feedback to management

Required Skills:**Technical:**

- University degree (BS/MS) in Computer Science, Electrical Engineering or equivalent
- 3+ years of working experience building web applications and web services
- Server-side programming skills
- Strong technical background with web-related technologies (Javascript, AJAX, HTML, CSS, Web services, databases)
- Experience with AJAX frameworks
- Strong debugging and bug-fixing skills
- Abilities to analyze, profile and optimize code for performance and memory usage
- Excellent knowledge of design patterns
- Expertise in data structures and algorithms

Nice to have:

- Flex/ActionScript development know-how
- Experience building or customizing AJAX widgets, mashups
- Experience with .NET development
- Experience building SaaS projects
- Experience with agile development methodologies

Personal:

- Strong interpersonal and communication skills
- Ambitious and self-driven
- Pro-active and detail-oriented
- Fluent in English (both written and spoken)
