

Flex/ActionScript Developer – Technology and Service Innovation Group: ADOBE Romania

The Team

The goal of the TXI is to drive consistent thought-leadership across the Adobe Technical Services in creating innovative experiences upon Adobe technology and user-experience design. As importantly, a goal of the TXI is to ensure that irrespective of where a customer is in the customer lifecycle - pre-sales, professional service delivery, post-sale support or customer care, we are providing a consistent message and methodology to helping our customers to be successful upon innovative solution delivery upon Adobe technology. In support of delivering this best-imaginable customer experience, both to our customers and - through the solutions we enable them to deliver - their customers and end-users, TXI is also responsible for ensuring that the tools, products and services that we develop to support our ability to deliver and support innovative solutions on both sides of the glass with Adobe technology, are themselves examples of the kind of innovation that can occur when we apply user-experience design with Adobe technology

The Project

The Radon – Hendrix project aims to deliver a differentiated self-service and content-aggregation solution, providing an exceptional user-experience to support consultants, partners, consumers and enterprise customers upon Adobe technology, while capturing meaningful information about how these customers are leveraging Adobe technology, the challenges they are facing and their overall customer satisfaction with our technology, that can inform business decisions made within technical services, Adobe business units and at executive team level.
