Job Description

This is an important new position in world leading software company Adobe. To be responsive to customer requirements, the team uses development and testing methodologies with short release cycles to develop its core code base and is in the process of developing fully automated systems to run automated tests nightly on all system code.

The Quality Engineer will work closely with other staff members to maintain and manage the test infrastructure as well as being part of the quality and release process for the products for which the team is responsible. This position is strictly for a highly technical candidate with a proven testing track record in delivering large complex initiatives within aggressive timescales. The suitable candidate will need to be adaptable to align to project diverse requirements.

The ultimate breadth and scope of the position is limited only by the skills of the candidate. As a team in a well established company working on innovative products, this position offers excellent opportunities for personal development.

Line Manager

The Quality Engineer will report to the QA Manager and will be joining a team of 6 other people located in Moldova, London, San Francisco and Israel.

Responsibilities

- Responsible for all the QA activities in for the assigned projects including:
 - Execute test cases
 - Enter clear, reproducible bug reports
 - Write test cases
 - Coding automated test cases
 - Working with team on implementing and executing load and performance testing
- Functional and non functional test specification, execution and reporting.
- Maintenance of test environment and the software deployment process.
- Building a close relationship with development and operations teams.

Required experience, qualifications and skills

- Strong technical background, experience in testing or integration of complex Java distributed solutions.
- Experience in performing test analysis and writing test case in loosely structured environments is required.

- Very good communication skills at oral and written level for business and fellow technical colleagues are required.
- Experience in writing and testing to formal specifications would be an advantage.
- Works independently using engineering practices to evaluate enhance and maintain existing quality methods & processes.
- Makes good technical decisions and completes tasks & assignments under only general direction
- Demonstrates self-initiative and self-motivation and recognizes problems that need further investigation seeking assistance only when needed
- Independently determines and develops approach to solutions for a wide range of technically difficult problems, under only very general direction.
- Knowledge of SQL
- Solid working knowledge of Unix/Linux
- Other useful additions to the candidates CV:
 - Experience in Java development
 - Experience in C / C++ development
 - Experience in high transaction distributed load environments
 - Experience in system administration (Unix or Windows)
 - ISEB Foundation certificate in Testing
- Education: A Bachelors degree in Computer Engineering, Computer Science or equivalent discipline or a Scientific degree/MSc

Work environment

Adobe (NASDAQ: ADBE) revolutionizes how the world engages with ideas and information. For 25 years, the company's award-winning software and technologies have redefined business, entertainment, and personal communications by setting new standards for producing and delivering content that engages people virtually anywhere at any time. From rich images in print, video, and film to dynamic digital content for a variety of media, the impact of Adobe solutions is evident across industries and felt by anyone who creates, views, and interacts with information. With a reputation for excellence and a portfolio of many of the most respected and recognizable software brands, Adobe is one of the world's largest and most diversified software companies.

Today, Adobe is better positioned than ever to push the boundaries of the digital universe. Under the leadership of President & CEO Shantanu Narayen, we're driving even greater innovation with powerful, compelling software solutions that meet the needs of customers and markets ranging from designers and filmmakers, to enterprises and governments, to developers and home users.

Recognizing that employees are at the core of our success, Adobe recruits and retains highly qualified and motivated individuals, creates an environment where they can innovate and achieve their best, and rewards them for their performance by giving them an opportunity to share in the company's success.

About Adobe EMEA

Adobe employs over 1,100 people in the EMEA region; 30 offices in 20 countries. Our Sales, Marketing & Consulting functions operate from a network of 12 primary offices distributed across the main EMEA capitals and are growing presence in emerging "high potential" territories. Adobe EMEA plays a significant role in research & development, with world-class engineering centres in Hamburg and Bucharest, and a regional centre for Technical Support based in Edinburgh; also housing staff from our consulting business. In addition, Adobe also has a regional shared services and operational centre in Dublin, Ireland.
