

Software Quality Engineer - Adobe Globalization Team

Recognizing that employees are at the core of our success, Adobe recruits and retains highly qualified and motivated individuals, creates an environment where they can innovate and achieve their best, and rewards them for their performance by giving them an opportunity to share in the company's success.

Adobe's office in Romania serves as a Research and Development center and focuses on improving Adobe products such as Dreamweaver, Flex and AIR, and researching related web technologies. The center also provides Adobe with greater access to the business community and the expertise in the growing Eastern European market.

Position summary

If you think finding and suggesting solutions to quality problems is a challenge worthy of you, the Adobe Globalization Team is looking for a Software Quality Engineer. You must be highly-motivated with excellent testing skills and a passion for creating great software. You will be working on projects and technologies creating rewarding experience for international Adobe product users.

Main responsibilities:

- Highly proficient at finding and reporting software defects;
- Work with developers to write use cases and specifications for new features;
- Develop and execute test plans and test cases for complex technically challenging features;
- Exceptional talent for detecting gaps or oversights in implementation decisions as well as recommending improvements in functionality;
- Proactive communicator identifies and communicates risks based on technical knowledge and experience;
- Interact with other engineers to ensure that project deliverables meet the required quality standards;
- Independently create and owns methods to verify and approve newly developed or modified component and systems;
- Participates in product requirements and development sessions using testing approaches and best practices to contribute to design decisions and to ensure seamless integration of new features with current system functionality;
- Investigates and recommends ways to improve product functionality, usability, reliability performance and security

Required skills :

- University degree (BS/MS) in Computer Science, Electrical Engineering or equivalent
- A minimum of three (3) years experience as a Software Test and Quality Control/Assurance Engineer;
- Ability to proactively identify process bottlenecks and implement solutions;
- Understanding of an SaaS environment;
- Proficiency writing and executing test plans and test cases that support web-based, client-facing applications;

- Specific QA/QC expertise and experience with load and performance testing required;
- Basic experience in computer programming and scripting required;
- Ability to lead and plan schedules for QA projects.

Nice to have :

- Scripting languages or coding for web apps such as JavaScript, HTML, PHP, ActionScript, etc;
- Knowledge and experience in developing testing frameworks
- Knowledge of SQL and database applications;
- Familiarity with Localization processes;
- Familiarity with Adobe web applications.

Personal :

- Strong interpersonal and communication skills (both written and verbal);
- Great team player;
- Ambitious and self-driven;
- Pro-active and detail-oriented;
- Fluent in English (both written and spoken)
